

CORTICAL ELECTRODES

FOR CORTICAL EEG RECORDING AND FUNCTIONAL MAPPING

Class III, CE mark issued by the notified body LNE/G-MED 0459

- ◆ Contact diameter 2.5 mm
- ◆ Thickness 0.7 mm
- ◆ Width of strips 10 mm
- ◆ Distance between the contacts 10 mm
- ◆ Pre-cut grid or strip, to adapt to the areas to explore
- ◆ Thin and flexible
- ◆ Numbering of contacts
- ◆ Good tensile strength
- ◆ Platinum/iridium
- ◆ Single-use sterilised item, delivered with blue connection holder

Made of silicone, the cortical electrode adapts perfectly to the areas to explore.

References	Nr of contacts per strip	grid 8 strips	grid 7 strips	grid 6 strips	grid 5 strips	grid 4 strips	grid 3 strips	grid 2 strips	1 strip
	8	C10-64AM	C10-56AM	C10-48AM	C10-40AM	C10-32AM	C10-24AM	C10-16AM	C10-08AM
	6	C10-48BM	C10-42BM	C10-36BM	C10-30BM	C10-24BM	C10-18BM	C10-12BM	C10-06BM
	4	C10-32CM	C10-28CM	C10-24CM	C10-20CM	C10-16CM	C10-12CM	C10-08CM	C10-04CM

Bold character references correspond to most current models available in stock.

- ◆ Connection with blue extension cables **PCP-16**** and adapters **ADP****, or connection cables **CBL**** enabling to connect 1 or 2 strips
- ◆ Colour coding for the identification of the connectors after implantation
- ◆ Tunnelable connectors

EXTRA BLUE CONNECTION HOLDER SCC-08S-10

Class I, CE mark issued by the notified body LNE/G-MED 0459

- ◆ Single-use sterilised item, individually packed, delivered per lot of 10

Read carefully the information in the instruction for use manual and on the labeling
